

Addendum: CMS Expands Medicare Telehealth Benefits During COVID-19 Pandemic

***Effective March 1, 2020 and for the duration of the COVID-19 Pandemic**

Medicare Payments

- Medicare will pay for telehealth services at the same rate as regular, in-person visits.
- Prior-authorization requirements have been suspended
- Providers have flexibility in waiving deductibles and copays
- Non-Medicare payors are encouraged to follow the same CMS guidelines for payment and coverage at this time.
(Note: Many private payors offering \$0 copays for telehealth.)
- There are several physician financial relief provisions that were included in the CARES Act (Public Health Emergency Fund Grants (provider relief fund), small business loans (Paycheck Protection Program – PPP), authority for the expansion of the Advance Payment Program, and the suspension of sequestration through 2020.

Waiving of HIPAA Requirements

- HHS has removed penalties for HIPAA violations against providers. Communication via consumer technology like Skype and FaceTime may be used.
- Public-facing social media communication (Facebook, Instagram) may not be used.

New vs. Established Patient Restrictions Lifted

- New patients are now eligible for telehealth via phone calls, e-visits, and virtual check-in

Time-Based Billing for Total Physician Time

- Billing E/M visits is based on total time the physician spends on the patient, rather than face-to-face time only. This includes total time for physician review of records and time for physician documentation. Note: This does not include staff time with the patient.
- In addition, the requirement for 50% counseling has been dropped.

Phone Calls Reimbursable Under the 9944x Codes

- **Increased payments for audio-only telephone visits will match payments for similar office and outpatient visits, from a range of about \$14-\$41 to \$46-\$110, retroactive to March 1st (see attached updated Billing/Coding At A Glance)**
- New or established patients are eligible
- 99441 for 5-10 min
- 99442 for 11-20 min
- 99443 for >21 min

ASCRS | ASOA

Practicing Across State Lines

- Physicians licensed in one state can provide services to Medicare beneficiaries in another state.

Tele-Staffing of Residents & Fellows

- In-person staffing requirements have been lifted during this time, to allow the minimum number of providers to risk exposure.
- Attestation statement is required.

Removal of Originating Site Requirements

- Medicare will make payment for professional services furnished to beneficiaries nationwide, in all settings, including their homes.

BILLING/CODING AT A GLANCE				
Type of Service	Description	CPT Code	Reimbursement	RVUs
