2016 A YEAR OF giving SIGHT

Humanitarian Eye Care

Partnering to Give Sight

We have built a network of partner organizations dedicated to humanitarian eye care and have initiated the visual care of our partners throughout the African continent. Through our annual efforts in 2016, we were able to:
- Conduct a successful surgical glaucoma training course for ophthalmologists.
- Assist in the development of a 4-year resident program in ophthalmology at the University of Nairobi.
- Conduct 1200 operations on 900 patients in the three-month span of the program.
- Share high-quality surgical and non-surgical techniques, and plans in even the remotest areas can be treated.

The Robert Sinskey Eye Institute

Now in its 52nd year of continuous operation, the Robert Sinskey Eye Institute (RSEI) in Addis Ababa, Ethiopia treated over 23,000 patients in 2016 – up from just 6,000 a decade ago.

In 2016, the ASCRS Foundation awarded $50,000 to support the innovative research efforts of five inspiring young ophthalmologists. The awardees and the projects were:
- Donga Bokpon, MD: Utility of the preoperative visual examination and preoperative month 1 visual examination after cataract surgery.
- Heather Outhen, MD: Long-term outcomes of trabeculectomy plus MMC for glaucoma.
- Matthew Z. Reder, MD: Development of novel optical coherence tomography imaging.

In 2016, the ASCRS Foundation awarded 1.02 million dollars to support the innovative research efforts of five inspiring young ophthalmologists. The awardees and the projects were:
- Sara J. Smith, MD: Microsurgical flow rate and surgical outcomes after cataract surgery.
- Phillip J. Shadbolt, MD: The relationship between dexamethasone and acute angle closure.
- Richard J. Hamlen, MD: Epidemiology of ocular disease and the role of genetics.
- Scott K. Stansor, MD: The role of intraocular lenses in the management of ocular trauma.
- Amanda K. Seidley, MD: Three-dimensional ophthalmic imaging with optical coherence tomography.
- Adam S. Reidele, MD: Development of novel optical coherence tomography imaging.

Through our Resident Excellence Award, we provided travel grants to eight outstanding ophthalmology residents to attend the 2016 ASCRS Annual Symposium in New Orleans. Selected through competitive application process, the 2016 award winners were:
- Sameh Aziz, MD
- Sajina Ghosh, MD
- Antonio Kolev, MD, PhD
- Mani Ahmadi, MD
- Walter T. Parker, MD
- Zane Sredni, MD
- Reid Turner, MD
- E. Virgili, MD, FACS

**A Letter From Our Co-Chairs**

Thank you for your continued support, corporate supporters and partnering physicians. We are committed to being a leader in medical research and development and providing education and training to our medical community.

As we reflect in 2016, we also look to the future in 2017, the ACSOS Foundation will continue to support medical research and education in the United States and internationally. The Foundation has set ambitious goals in 2017.

1. To provide educational aid to physicians and to advance medical education opportunities.
2. To support medical advances in Alzheimer’s disease and related neurodegenerative disorders.
3. To encourage medical advances in the field of ophthalmology.

Internationally, the Foundation has set ambitious goals in 2017.

1. To provide educational aid to physicians and to advance medical education opportunities.
2. To support medical advances in Alzheimer’s disease and related neurodegenerative disorders.
3. To encourage medical advances in the field of ophthalmology.

Our mission continues to expand. Here in the United States, we are committed to providing quality medical care to all patients, regardless of their ability to pay. We are dedicated to advancing medical research and development.

As we move into 2017, we are excited about the potential for new medical breakthroughs and advances in medical research and development.

Finally, in 2017, the ACSOS Foundation will continue its support of medical research and development and the advancement of medical education opportunities.

Our goals are clear, and we are committed to achieving them. We are dedicated to providing quality medical care to all patients, regardless of their ability to pay. We are committed to advancing medical research and development and the advancement of medical education opportunities.

We are grateful for the support of our partners and our medical community, and we look forward to continuing our partnership in the future.
2016 Corporate Partners

Without the dedicated support of industry, it would be very difficult for the ASCRS Foundation to deliver our much needed programs. Our generous industry partners provide the financial resources, equipment donations, and even volunteer time necessary to achieve our mission.

**Diamond ($75,000+)**
- Alcon Foundation
- Allergan

**Platinum ($50,000+)**
- AMO
- Shire

- Glaukos Corporation
- OcuSOFT Inc.
- Smart Vision Labs
- TearScience

We want to say thank you to a loyal supporter...

Shire’s purpose is to enable people with life altering conditions to lead better lives by developing innovative medicines for rare and specialty conditions. This commitment to developing specialty medicines in areas of unmet need has driven Shire’s entry into ophthalmics. Shire believes that eye health is critical to overall health and wellness at every stage of life. Shire is working to develop innovative medicines in dry eye disease, infectious conjunctivitis, retinopathy of prematurity, autosomal dominant retinitis pigmentosa and glaucoma to help patients and eye care professionals better manage these conditions.

Shire is a proud to support ASCRS Foundation’s Operation Sight program - from its inception In 2016, Shire was not only a supporter of our Operation Sight program, but became a co-sponsor of the annual Run for Sight 5k/1 mile walk at the ASCRS Annual Symposium & Congress.

“We believe it is important that industry and advocacy organizations collaborate to benefit the patients we all serve in our work each day, and we look forward to continuing to support ASCRS Foundation and its ongoing efforts to improve access to eye care around the world.” - Robert Dempsey, Vice President, Eye Care, Shire

...and welcome to a new supporter....

For more than 122 years, OCULUS has been a partner for eye care professionals around the world. OCULUS provides support for the challenging daily tasks these specialists encounter by developing sophisticated technology-based instruments of the highest quality and by providing them with in-service training for these instruments’ efficient operation. For cataract surgeons, OCULUS is manufacturing technology for planning accurate IOL calculations. OCULUS joined the ASCRS Foundation as a Silver level partner in 2016. They hope their donation will help the ASCRS Foundation bring humanitarian eye care to more underserved communities.
